COORDINATION CHEMISTRY REVIEWS

COORDINATION CHEMISTRY REVIEWS, VOL. 184 (1999)

AUTHOR INDEX

Alderighi, L., 311
Anderson, C.J., 3
Aragoni, M.C., 271
Arca, M., 271

Bal, W., 319
Bazzicalupi, C., 243
Beaty-Nosco, J.A., 91
Bencini, A., 243
Bianchi, A., 243

Crisponi, G., 291

Devillanova, F.A., 271
Dyba, M., 319

Faa, G., 291
Formica, M., 347
Fusi, V., 347

Gans, P., 311
Garau, A., 271
Giorgi, C., 243

Ienco, A., 311
Isaia, F., 271

Kowalik-Jankowska, T., 319
Kozłowski, H., 319

Lejeune, R., 125
Lewis, J.S., 3
Lippolis, V., 271
Lo, K.K.-W., 157

McCue, J.P., 67
Micheloni, M., 347

Nosco, D.L., 91

Peters, D., 311
Pontellini, R., 347

Reichert, D.E., 3
Romani, P., 347

Sabatini, A., 311
Schwietert, C.W., 67

Thunus, L., 125

Vacca, A., 311
Valtancoli, B., 243
Verani, G., 271

Yam, V.W.-W., 157

PII: S0010-8545(99)00089-2

SUBJECT INDEX

Anti-infective
  Coordination compounds in medicinal chemistry 67
Antineoplastic
  Coordination compounds in medicinal chemistry 67

^{13}C-NMR spectroscopy
  Charge-transfer adducts between donors containing chalcogens (S and Se) and di-iodine: solution studies 271
Complexation thermodynamics
  Pd(II) complexes of aliphatic polyamine ligands in aqueous solution: thermodynamic and structural features 243
Crystal structures
  Crystal ligands for selective lithium coordination 347
CT adducts with di-iodine
  Charge-transfer adducts between donors containing chalcogens (S and Se) and di-iodine: solution studies 271

Deferiprone
  Iron chelating agents in clinical practice 219
Desferrioxamine
  Iron chelating agents in clinical practice 291
Diagnostic imaging agents
  Metal complexes as diagnostic tools 3

PII: S0010-8545(99)00090-9

Disease states
Metal complexes as diagnostic tools 3

Enzyme inhibitors
Coordination compounds in medicinal chemistry 67
Escherichia coli
Coordination compounds in medicinal chemistry 67

Fe(II)
Coordination compounds in medicinal chemistry 67

Imaging contrast agents
Overview of transition metal and lanthanide complexes as diagnostic tools 125
Iron-chelators
Iron chelating agents in clinical practice 291

Lanthanides
Overview of transition metal and lanthanide complexes as diagnostic tools 125
Recent advances in utilization of transition metal complexes and lanthanides as diagnostic tools 157

Macrocycles
Pd(II) complexes of aliphatic polyamine ligands in aqueous solution: thermodynamic and structural features 243
Cryptand ligands for selective lithium coordination 347
Metal complexes
Metal complexes as diagnostic tools 3
Metallo-drugs
Coordination compounds in medicinal chemistry 67
Metallopeptides
Specific structure–stability relations in metallopeptides 319

NMR spectroscopy
Cryptand ligands for selective lithium coordination 347
Nucleic acid
Recent advances in utilization of transition metal complexes and lanthanides as diagnostic tools 157

Palladium
Pd(II) complexes of aliphatic polyamine ligands in aqueous solution: thermodynamic and structural features 243
Palladium complexes
Pd(II) complexes of aliphatic polyamine ligands in aqueous solution: thermodynamic and structural features 243
Polyamines
Pd(II) complexes of aliphatic polyamine ligands in aqueous solution: thermodynamic and structural features 243
Precipitates
Hyperquad simulation and speciation (HySS): a utility program for the investigation of equilibria involving soluble and partially soluble species 311
Proteases
Coordination compounds in medicinal chemistry 67
Pseudomonas
Coordination compounds in medicinal chemistry 67
Pt(II)
Coordination compounds in medicinal chemistry 67
Purity of product
Chemistry of technetium radiopharmaceuticals 1: Chemistry behind the development of technetium-99m compounds to determine kidney function 91

Renal physiology
Chemistry of technetium radiopharmaceuticals 1: Chemistry behind the development of technetium-99m compounds to determine kidney function 91
Review
Charge-transfer adducts between donors containing chalcogens (S and Se) and diiodine: solution studies 271

Salmonella
Coordination compounds in medicinal chemistry 67
Solution equilibria
Hyperquad simulation and speciation (HySS): a utility program for the investigation of equilibria involving soluble and partially soluble species 311
Speciation
Hyperquad simulation and speciation (HySS): a utility program for the investigation of equilibria involving soluble and partially soluble species 311

Structure–stability relations
Specific structure–stability relations in metallopeptides 319
Sulfides and selenides
Charge-transfer adducts between donors containing chalcogens (S and Se) and diiodine: solution studies 271

Technetium-99m
Chemistry of technetium radiopharmaceuticals 1: Chemistry behind the development of technetium-99m compounds to determine kidney function 91
Telomerases
Coordination compounds in medicinal chemistry 67
Thalassemia
Iron chelating agents in clinical practice 291
The proline break-point
Specific structure–stability relations in metallopeptides 319
Thiones and selones
Charge-transfer adducts between donors containing chalcogens (S and Se) and diiodine: solution studies 271
Ti(IV)
Coordination compounds in medicinal chemistry 67
Transition metal complexes
Overview of transition metal and lanthanide complexes as diagnostic tools 125
Recent advances in utilization of transition metal complexes and lanthanides as diagnostic tools 157
Transport
Coordination compounds in medicinal chemistry 67
Tuberculosis
Coordination compounds in medicinal chemistry 67

UV–visible spectroscopy
Charge-transfer adducts between donors containing chalcogens (S and Se) and diiodine: solution studies 271
